**Summary:**  
AI Engineer bridging the gap between computer vision, LLMs and agentic workflows I build end to end systems that actually drive business value My background covers everything from engineering custom datasets for multimodal models to building secure RAG infrastructure and n8n automations.

**Experience:**  
**ML & AI Instructor, NTI (National Telecommunication Institute), Part-time**  
Jul 2026 – present

- Designed and delivered ML & AI curriculum for NTI's Machine Learning and Ai Program
- Developed hands-on lessons and applied projects bridging theory to real deployment for cohorts of university Students.

Experience:

**ML & AI Instructor, NTI (National Telecommunication Institute), Part-time** Jul 2026 – present

- Designed and delivered ML & AI curriculum for NTI's Machine Learning and Ai Program
- Developed hands-on lessons and applied projects bridging theory to real deployment for cohorts of university Students.

*Computer Vision and LLM Engineering Intern* Apr – Jun 2026

- Architected advanced DL and ag... rks deploy LLMs, VLMs, multimodal models for Rag systems, agentic workflow and generative processing.
- Directed a 5-member team to build BitSoul, an end-to-end platform converting real human photos into fully playable game characters and Animated video output (Wan 2.2 I2V + Gemini choreographer + ffmpeg) and Talk mode (Wan 2.2 S2V + CosyVoice 2 TTS + lip-sync)

**Programming Instructor, Trouble Shooters, part-time,** Sept 2023 – Jan 2025

- Instructed students in Python fundamentals, advanced data structures, and algorithms.
- Designed and delivered structured lessons, engaging students through hands-on projects and real-world applications.

## Projects:

### RadQuant — AI Diagnostic Radiology Assistant *(Lead a Team of 5)*

Privacy-first, fully on-premise AI assistant for medical imaging, generalist across modalities, specialist on chest X-ray — running entirely on a single local GPU with no patient data leaving the site.

- Designed a detector + writer pipeline combining a calibrated DenseNet-121 classifier (18 chest findings) with MedGemma 1.5 VLM (LangGraph state machine) for triage, report drafting, Grad-CAM explainability, and two-stage omission QC.

Image Hashing, SSIM, and SSIM, and SD measures to ensure high-fidelity frame selection.

- Engineered a robust classification dataset of 5,872 samples with ground-truth labeling for accident/non-accident classification models.
- Curated actionable visual data for downstream Deep Learning models, by distilling complex video sequences into optimized 5-frame representative subsets.

**Machine Learning Intern, The Sparks Foundation, Remotely, part-time,**

Mar 2022 – Jun 2022

- Developed and optimized supervised and unsupervised machine learning models, utilizing Scikit-Learn to deliver high-accuracy predictive solutions for various datasets.
- Engineered data pipelines involving feature selection and preprocessing, ensuring robust model performance through rigorous evaluation metrics and validation techniques.

**Education:**

- **Bachelor of Computer and Data Science**, Alexandria University, GPA: 3.64 Jan 2025
